SPECIALIST FACIAL TREATMENTS

Microdermabrasion

Express (10 minutes)

Cleansing (20 minutes)

Brighter, smoother, softer

Microdermabrasion treatments are used to improve the texture and quality of your skin. This treatment is fantastic at tackling dull, dry or rough skin, treating acne and reducing superficial pigmentation and fine lines. Microdermabrasion treatments are commonly used in combination with other treatments. It is perfect to polish and deeply exfoliate your skin, while also promoting lymphatic draining. The small microderm hand piece is then passed over the face to loosen and remove the upper layer of dead skin cells. Following treatment, your skin will be brighter, smoother and softer to touch. We recommend six sessions at fortnightly or monthly intervals for ultimate improvement.

The Benefits:

All skin requires regular conditioning treatments to encourage radiance.

Microdermabrasion does just that, removing dead skin cells and allowing new, healthy skin to shine through.

The effects will last approximately a month, but can vary from person to person.
